Std: 5th Revision Sub: ComputerQ-1 Multiple Choice Questions:-

1. CU stands for
 (a) Central Unit (c) Control Unit
 (b) Centralised Unit (d) Controlling Unit.

2. Which of the following is a volatile memory?

- (a) RAM (c) RAAM
 (b) ROM (d) ROME.

3. Which is not an operation of a computer?
 (a) Processing (c) Storage
 (b) Input (d) Output

$$\text{ } + \text{ } + \text{ } + \text{ } + \text{ } - \text{ }$$

4. Which devices allows you to put information into the computer?

- (a) Processing (b) Output
 (c) Input (d) Storage.

5. It is an arrangement of wires that provide a physical medium for the flow of data.

- (a) ROM (c) CD
 (b) RAM (d) BUS.

6. ATM stands for

- (a) Any time money.
 (b) Automated teller machine.
(c) Animated teller machine
(d) Antique teller machine.

7. Supercomputers are used for

- (a) Writing a letter.
 (b) Weather forecasting.
(c) Airline Reservations
(d) Space Technology.

8. Cartoons are possible only through computers.

- (a) Cartoons
(b) designing buildings
(c) Movies
(d) virtual reality.

$$\text{○} + \text{○} + \text{○} + \text{○} + \text{③} = \text{○}$$

9. Animation is an illusion of movement created by displaying a series of pictures quickly.
- (a) Animationed (c) Animation
(b) Embedded (d) Research
10. Weather forecasters collect the data from
- (a) CPU (c) ATM
(b) Advertising (d) Satellites.
11. An ATM has an in-built computer chip.
- (a) Satellite
(b) CPU
(c) ATM
(d) PIN.
12. Radars are controlled using computers.
- (a) bulky paper.
(b) Radars
(c) Libraries
(d) Cartoons.
13. With the help of a computer network, any information can be circulated very quickly.
- (a) Working with internet.
(b) Internetwork
(c) Networking
(d) Computer Network

$$\text{○} + \text{○} + \text{○} + \text{④} + \text{○} = \text{○}$$

14. Computers are used in defence modern weapons and missiles depend on for inputs.

- (a) Input
- (b) Output
- (c) Storage
- (d) Processing.

15. Computer animation is an art of creating moving images by the use of computer.

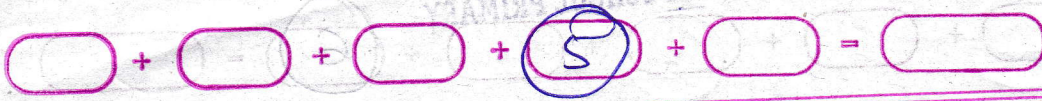

- (a) Advertising
- (b) Schools
- (c) Animation.
- (d) Entertainment.

16. Computers are used in banks for online enquiry of customers account balance.

- (a) defense services
- (b) offices
- (c) Space Technology
- (d) banks

17. Embedded devices have a software which is permanently built inside the CPU.

- (a) Softwares
- (b) Hardwares
- (c) Embedded computer

(d) computer chip.

18 Powerful computers, known as supercomputers are used for weather forecasting.

- (a) Microcomputer
- (b) Supercomputer
- (c) Minicomputer
- (d) Mainframe.

19 A set of one or more programs is called software.

- (a) software
- (b) hardware
- (c) primary memory
- (d) secondary memory.

20. The Arithmetic Logic Unit is responsible for doing the calculation work.

- (a) Control Unit
- (b) Computing
- (c) calculation
- (d) Motherboard.

21. CU controls the flow of data between the memory, ALU and other parts of the computer.

- (a) ALU
- (b) RAM
- (c) ROM
- (d) CU

+ + + + =

6

22 A computer is an electronic machine, which accepts the input and processes it to provide output.

- (a) Automatic
- (b) embedded
- (c) electronic
- (d) mechanical

23 The two types of memory in computer are primary and secondary.

- (a) ALU and CU
- (b) primary, secondary
- (c) Processing, output
- (d) Storage, input,

24. The ALU does all the calculations inside the CPU.

- (a) PU
- (b) MU
- (c) CU
- (d) ALU

25 The read-only memory is non-volatile in nature.

- (a) read-only
- (b) write only
- (c) Random access
- (d) Read and write

$$\text{○} + \text{○} + \text{○} + \text{○} + \text{○} = \text{⑦}$$

26 Storage refers to the saving of information.

- (a) Unstorage
- (b) Storage
- (c) Memory store
- (d) Storage machine operated

27 What is full form of GIGO?

- (a) Garbage in, Garbage out.
- (b) Large Memory
- (c) Gain in, Gain out
- (d) Godown in, Godown out

28 The Random access memory is the volatile memory.

- (a) Read-only memory
- (b) Random-access memory
- (c) Read and Random
- (d) Electronic.

29 The physical components of a computer are called hardware.

- (a) Memory
- (b) Storage
- (c) hardware
- (d) Software

30. A computer never makes mistakes

- (a) Calculation
- (b) mistakes

$$\boxed{} + \boxed{} + \boxed{} + \boxed{} + \boxed{} = \textcircled{8}$$

- (c) ALU
(d) CU

31) The central processing unit in a computer is placed on a single-integrated-circuit chip called a microprocessor.

- (a) integrated-memory
(b) integrated-circuit
(c) internal components
(d) internal cabinet.

32) Speakers is an output device.

- (a) keyboard
(b) speakers
(c) pen drives
(d) DVD

33) A computer is a very fast device and solve numerous problems within seconds

- (a) minute
(b) seconds
(c) hour
(d) milliseconds

34) Computerised equipments are used for medical tests and surgeries in hospitals.

- (a) ~~libraries~~ Libraries
(b) Space Technology
(c) Defence
(d) medical

35 Cartoons are possible only through animation.

(a) Advertising

(b) Media

✓ (c) Cartoons

(d) Entertainment.

36 Special effects are used in a film combined with real scenes and characters.

(a) Antique effects

✓ (b) Special effects

(c) movement

(d) pictures

$$\text{○} + \text{○} + \text{○} + \text{○} + \text{⑩} = \text{○}$$

37 A collection of organised information that can be easily accessed and managed is called database.

- (a) patient
- (b) teachers
- (c) database
- (d) Recovery.

38 A lot of data is collected from weather stations and satellites.

- (a) Banks
- (b) weather stations
- (c) Powerful stations
- (d) common network.

39 An ATM is used by inserting a card that contains the customer's account number and PIN on a magnetic strip, into the ATM machine.

- (a) AMT
- (b) PIN
- (c) NPI
- (d) embedded system

40. The tickets are printed, booked and issued to customers.

- (a) counters
- (b) booking
- (c) information.
- (d) tickets

$$\boxed{} + \boxed{} + \boxed{} + \boxed{} + \boxed{} = \boxed{11}$$

41. Calculators are examples of Embedded Systems.

- (a) CPU chip
- (b) Speakers
- (c) Computers
- (d) Calculators.

42. Computers are also used in offices to make various presentations and reports

- (a) presentations
- (b) advertising
- (c) word
- (d) illusion

43. If the input given is incorrect, the output produced will also be incorrect. This is called GIGO

- (a) microprocessor
- (b) miniprocessor
- (c) ~~ALU~~ GIGO
- (d) ALU

44. The place of a computer varies from place to place as per the requirement of the place.

- (a) time to place
- (b) place to place
- (c) time to time
- (d) place to time

$$\boxed{} + \boxed{} + \boxed{} + \boxed{} + \boxed{12} = \boxed{}$$

427
421 427
5215

45 Computer animation, morphing, sound and video editing, which are the main components of advertising.

- (a) morphing and video
- (b) scenes and characters
- (c) Media and Entertainment
- (d) sound and video

~~46~~
